

A close-up, profile view of a woman drinking water from a glass. The entire image is tinted with a vibrant blue color. The woman's eyes are closed, and water is captured mid-sip, splashing around her mouth. The background is a soft, out-of-focus blue.

ATECA
the dutch water expert

**Clean and
safe water
for everyone**

**We're the
leading Dutch
manufacturer
of copper/silver
ionisation
systems**

What we believe in

**We believe
in safe
water for
everyone**

We believe that safe drinking water should be available for everyone, everywhere and that your environment should be safe from Legionella. No matter where you are in the world, we have a suitable solution to fight and overcome waterborne pathogens – giving you total confidence and trust in your water supply.

Who we are

We're a global leader in our industry

Not only are we leading the industry in water ionisation treatment in the Netherlands, we're also the front-runners across the world. A key reason for this is that our copper/silver ionisation process ensures drinking water is 100% Legionella safe and doesn't have any other harmful bacteria. Yes, that's 100%. In fact, we're the only Dutch supplier of ionisation systems included in ECHA's "Article 95" list as authorised suppliers for copper and silver. As a result, we're active in more than 15 countries with a strong distribution and knowledge network in Europe and the Middle East.

“Within a month Legionella was totally eliminated. Now we can enjoy a safe glass of water and take a safe shower, anytime.”

“We’ve saved an enormous amount of energy, water and hours.”

“I drink straight from the tap nowadays.”

What we do

**We create
100%
Legionella
safe
environ-
ments**

For many years, we’ve proudly delivered Legionella safe environments and safe drinking water for millions of people. Not only is our technique completely safe and affordable, it also doesn’t harm the environment. So everyone can enjoy a safe and healthy glass of water or shower day-after-day knowing it hasn’t cost the earth.

“Over the last **15 years**, we’ve provided an estimated **35 million people** around the world with a **Legionella safe environment** and **safe drinking water**.”

Our system

Our innovative purifying system

ICA water ionisation treatment

Our ICA Ionisation water treatment system successfully eliminates Legionella bacteria from water. It's a precision controlled process based on the ionisation of copper and silver. This state-of-the-art technique actually finds its origin in a method that's been used over hundreds of years to eliminate harmful bacteria in our drinking water. Today, we are the only Dutch supplier of ionisation systems included in ECHA's "Article 95" list as authorised suppliers for copper and silver.

Over the past 15 years, the system has provided a long lasting Legionella safe environment at more than 400 locations worldwide. Unique to the ICA system is the ICA ServiceLink, which continuously monitors the vital processes in the ICA system. It gives both ATECA and the customer great insight into the operation of the system at all times. And should anything need repairing or replacing, our experts are ready to help you.

ICA one

How does it work

The science of copper and silver ionisation

Copper and silver ions are released into the water and actively attack the bacteria and biofilm – a breeding ground for bacteria. The ionisation process itself is a very delicate one and needs to be closely monitored – something our system handles with absolute precision. The ICA system is renowned for its safety and reliability and we are world leaders in pushing further research, innovation and certification. As a result, our unique ICA system is unrivalled in the market, delivering something that's vital when it comes to water consumption and use - trust. Trust that every drop is safe from harmful bacteria.

Applications

You'll find our innovative systems in:

- Hospitals
- Hotels
- Super yachts
- Offshore
- Senior homes
- Special care homes
- Residential
- Marinas
- Medical centres
- Shopping malls
- Offices

Why work with us

There are so many benefits to the ICA system

It's not only its effectiveness that makes the ICA system so unique. It also saves our customers valuable time and frustration as contaminations, excessive flushing, thermal and chemical eradication are a thing of the past.

In fact, we take care of everything. We even offer the ICA ServiceLink, which gives our clients a 24/7 insight into the operation of their ICA system. It all adds up to multiple benefits including savings in water, energy and in turn, financial benefits. It's a win-win situation.

- Guaranteed 100% Legionella safe
- Guaranteed 100% safe drinking water
- 100% satisfaction money back guarantee
- Energy, water and financial savings
- ICA ServiceLink: 24/7 insight into the operation of the system
- Our experts are always on hand to help
