FAST

Segregation Pod

The AWallsz Segregation Pod is a Negative Pressure room designed to enhance patient and staff safety.

Using HEPA 14 Filtration, with 99.997% purification efficiency, the pod minimises the risk of infection through airborne transmissions.

This prefabricated, plug and play system has the ability to integrate plumbing, med gases, electrics and technology, and is designed specifically to fit your space.

With our range of antimicrobial finishes, whiteboards and custom graphics, this protective space can also be calming and interactive.

CLEAN

Medical Headwall

By using offsite construction methods, our pre-plumbed Medical Headwalls reduce the number of trades on site and allow for fast, clean, sustainable construction.

Maintenance is hassle-free with our removable panels, finished in highly cleanable and durable materials, sealed with infection prevention gaskets. There is no limit to what we can fit inside or on to our headwalls, so let us know what you want to achieve from your bedhead services, and we will design a solution that meets your needs.

All headwalls are a bespoke design to fit your space!

SUSTAINABLE

Handwash Station

Our prefabricated handwash stations can be designed to maximise the use of your space and provide you with efficient, compliant handwashing solutions.

These modules can be pre-plumbed directly into our smart wall system, combined within our bespoke casework solutions, or supplied separately to integrate into your existing facility.

All handwash stations are a bespoke design to fit your space!

ADAPTABLE

Nurses Station

Our prefabricated Nurses Stations have been designed to meet today's needs whilst being adaptable for tomorrow's challenges. Effective design elements from 30 years of healthcare experience and innovative finishes help lower the risk of Bioburden and improve storage and ergonomics to ensure staff and patient wellbeing. Every element of these units is completely customisable in size, finish and storage capacity.

All nurses stations are custom designed to fit your space!

CUSTOM

Casework

A Wallsz takes the methods used in precision-manufactured construction and applies them to the world of casework, cabinets, and storage. To create the desired functionality and design required, our design-integration platform 'ICE' will allow you to tailor the solution to your operative and aesthetic requirements.

We can integrate plumbing, technology, passthroughs, medical equipment, custom hardware and more.

All caseworks are a bespoke design to fit your space!
